

Our family is in full support of this long overdue bill. Not only is it annoying, but these deceptive sale tactics are ever-present throughout the state where gas stations purposefully display the lowest price for cash payments, and yet have higher prices for card payments. Furthermore, this bill should be expanded to stop the exceptionally deceptive tactic where gas stations have a sign displaying much lower gas prices, but they are only available for those who get an oil change or a car wash. This must stop! This is specific to the Shell gas stations across the street from each other on Rockville Pike and Twinbrook Parkway. It is a blatantly obvious money grab. Please put an end to this. It should not be too much to ask for businesses to simply be transparent with their pricing.
